NEVER QUIT

WHAT IS CRYPTO CURRENCY ?

A cryptocurrency is a digital or virtual currency that is secured by cryptography, which makes it nearly impossible to counterfeit or double-spend. Many cryptocurrencies are decentralized networks based on blockchain technology—a distributed ledger enforced by a disparate network of computers. A defining feature of cryptocurrencies is that they are generally not issued by any central authority, rendering them theoretically immune to **GOVERNMENT INTERFERENCE OR MANIPULATION.**

DECENTRALIZATION?

What does "decentralize" mean ? What are the advantages and what are the benefits ?

Decentralized marketing is created with an automated contract that offers you maximum security and sustainability. A smart contract is an automatic execution algorithm.

SMART CONTRACT ?

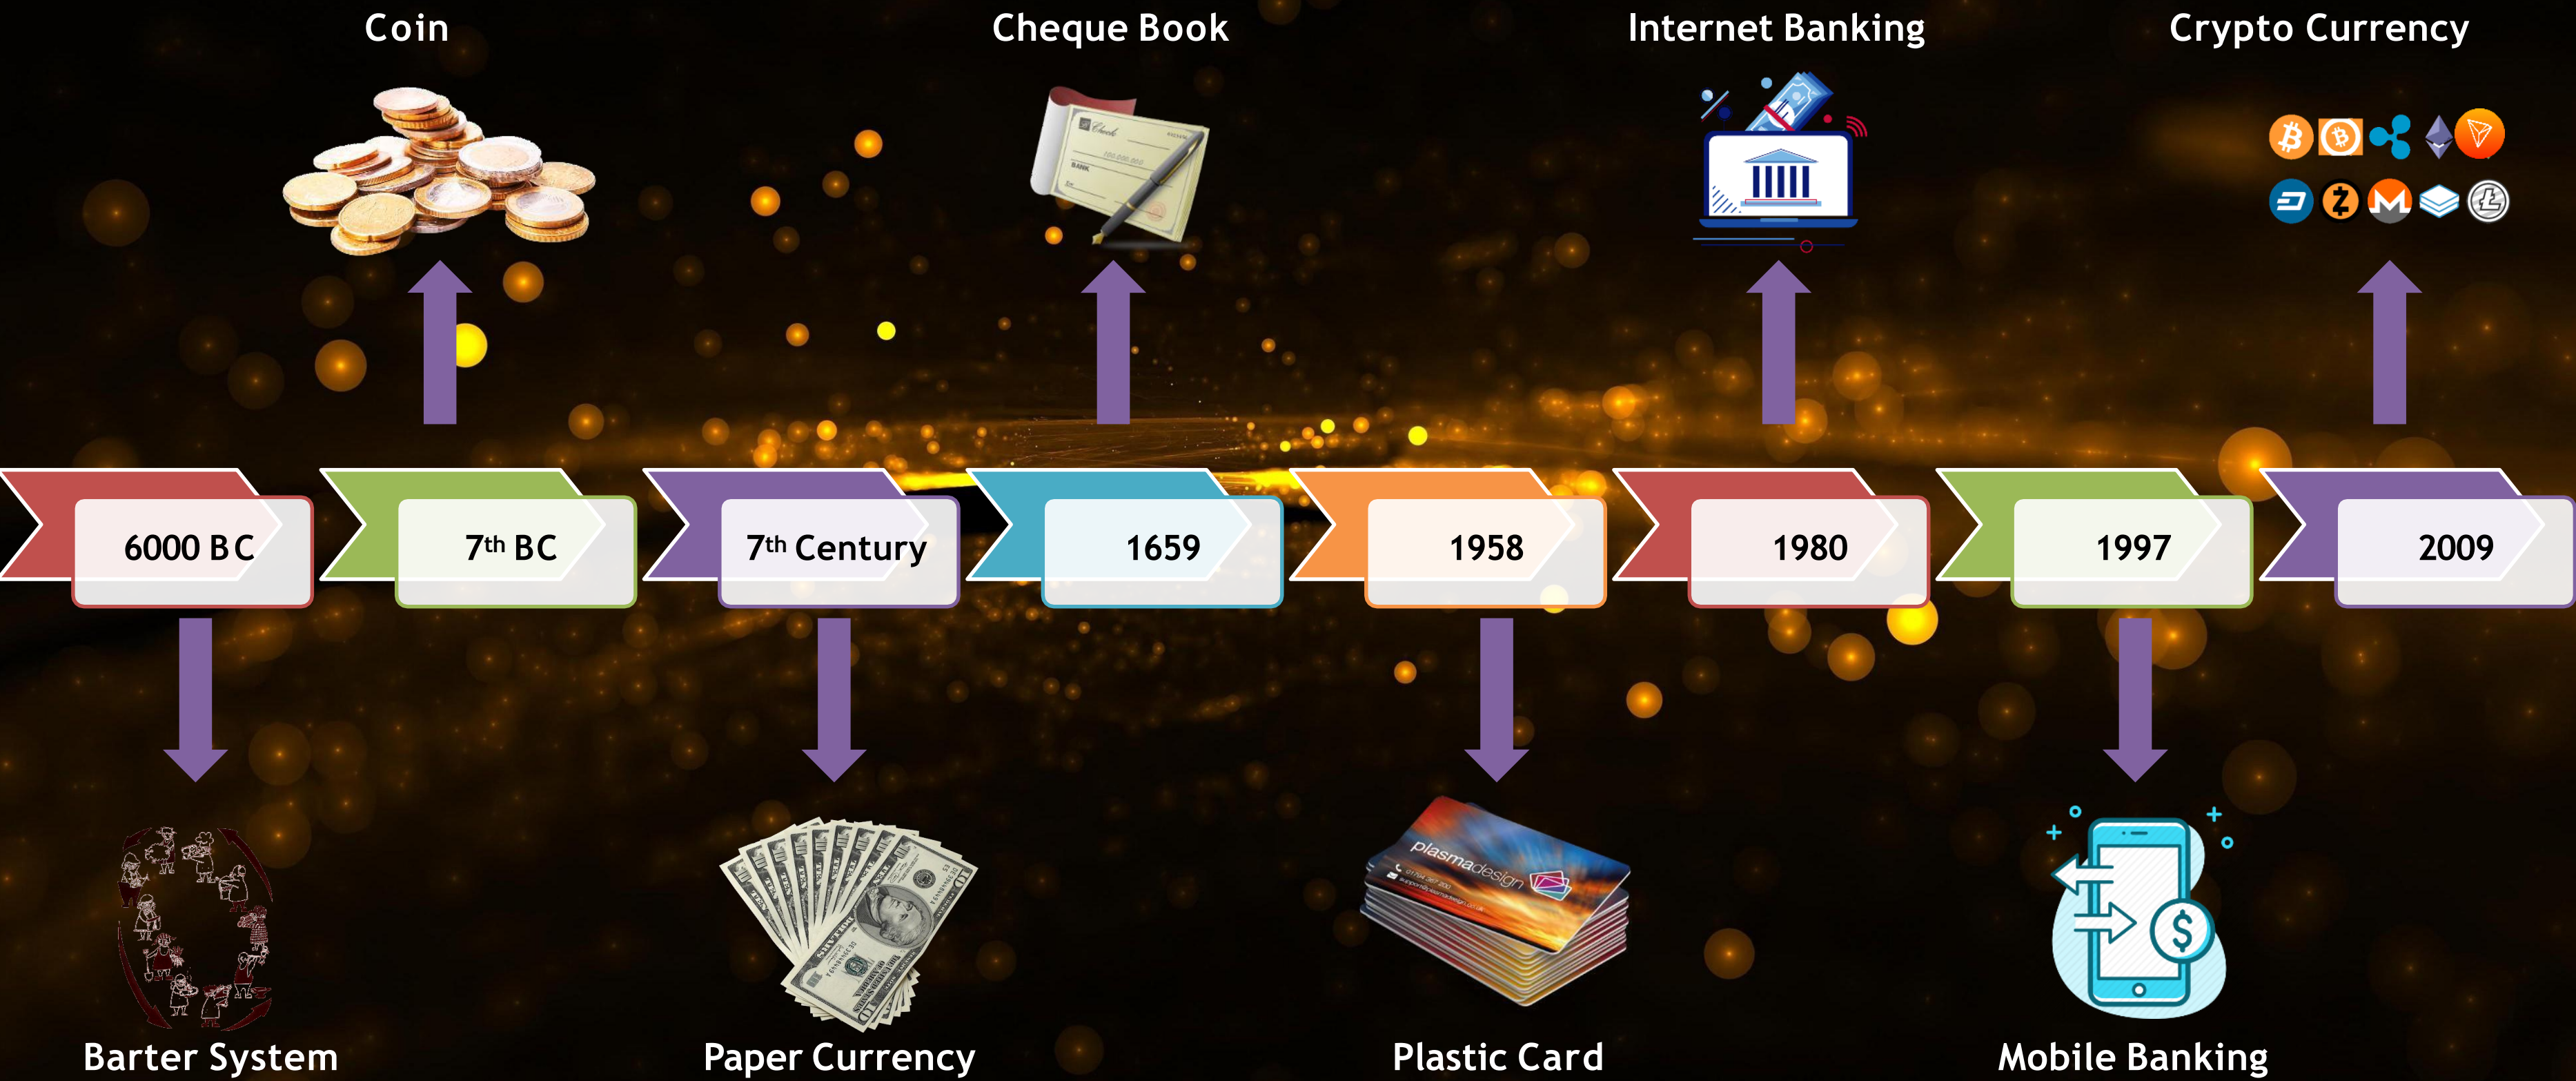

underlying program, without the possibility of subsequently Changing the defined execution. The code that contains all the logic of the contract expiration is on the blockchain and all calculations are provided by millions of computers around the world. This ensures that there is no risk of hacking into the smart contract and stopping the project.

MGX GLOBAL CROWD FUNDING

a large number of individuals to finance a new business venture. Crowd funding makes use of the easy accessibility of vast networks of people through social media and crowd funding websites to bring investors and entrepreneurs together, with the potential to increase entrepreneurship by circle of expanding the pool investors beyond the additional owners, relatives, and venture capitalists.

FUTURE OF CURRENCY
